

# DAMPERS

## Damper controls

AMS Damper control hardware, RG 10, 20, 30 and 60 are used to regulate the air stream in ductwork. They are easy to fit and provide efficient control of all damper sizes.

Galvanized steel and zinc die-cast  
Inexpensive for quick installation  
Multiple possibility of combination using threaded spring bearing and threaded solid bearing  
Recommended for use on 0,4 – 0,6mm sheet metal and for dampers of diameter up to 250mm (10")
